Registration and information obligations concerning REACH in the European Union

As a Swiss exporter, Alu Menziken Extrusion AG can not register any substances within the meaning of the REACH Regulation (1907/2006). The responsibility lies with the European importer. In order to ensure a high level of delivery reliability for our customers, we are intensively pursuing the implementation of REACH and the resulting requirements. For this purpose, we have designated the company LOG CONNECT AG, Rotterdamer Strasse 7 in DE-90451 Nuremberg, as sole representative based in the EU. The necessary registrations of substances which we export to the EU are carried out by the LOG CONNECT AG.

This procedure allows customers who purchase extruded aluminum products, machined parts, assemblies or other services from Alu Menziken Extrusion AG to be classified as "downstream users" according to the REACH regulation. As a "downstream user", your company is fundamentally not subject to any registration obligations under the REACH regulation.

With regard to the obligation to inform about substances in products according to art. 33 of the REACH regulation, we assume that the proportion of substances of very high concern according to the "candidate list" (Annex XIV of the REACH Regulation) in our products does not exceed the limit of 0.1% by mass.

The exception is the substance "**lead**" / **CAS number 743-92-1**, which is contained in the following alloys with the stated concentrations:

AA-2028A = 0.20 - 0.40%
EN AW-2007 = 0.80 - 1.50%
EN AW-2011 = 0.20 - 0.60%
EN AW-2030 = 0.80 - 1.50%
EN AW-6012 = 0.40 - 2.00%
EN AW-6018 = 0.40 - 1.20%

The candidate list of ECHA can be viewed at the following website:

<https://echa.europa.eu/de/candidate-list-table>

If you have any questions, please contact our REACH contact person Sebastian Feistkorn (Tel. +41 (0) 62 765 22 52) or contact your sales representative.

Kind regards

Alu Menziken Extrusion AG
